

PRESENTATION WEB EN ANGLAIS

1.

A) Personal details : Hello ! I'm Maxence, 17 years old and I'm currently studying at the IUT of Vélizy in Networks and Telecommunications. I'm going to give you a short presentation of my CV on this website.

Good reading to you.

My name : ARVIN-BÉROD

My phone number: 0652086501

My email : maxence.ab@protonmail.com

I currently live in Paris but I don't mind moving to work in the army.

The reason I want to join the army is that the pride I feel in being able to serve my country by doing my job is totally incredible.

B) Educational background :

--> B.U.T on Networks Telecom (equivalent to a bachelor degree)

--> Baccalauréat in Science Industrial Technology and Sustainable Development

--> Brevet (equivalent to GSCE)

C) Previous Work Experience :

I have just finished my B.U.T. in Non Alternance, I have no professional experience in the computer industry. But, as I have already worked during

the summer to earn some pocket money, I know the importance of knowing how to work and not to stay idle.

2.

A&B) Sporting Interests and Cultural :

During my secondary school years until my senior year I played basketball, which took 6 years of my life. Now I practice a combat sport: MMA (Mixed Martial Arts) which is the most complete sport in terms of combat and techniques.

Video of a legendary timeline of fight in MMA :

<https://www.youtube.com/watch?v=LJrn5WLdka4>

Talking about my hobbies, I love video games, which has influenced my life enormously, as well as computers, and more precisely hacking series and movies.

On a cultural level, I love the history of France, it is for me a pillar of western society. With its most varied cultures such as food, monuments, sacred buildings, many fantastic writers who have influenced many world trends, its origins, its struggles, its values and traditions are really, in my opinion, the most beautiful in the world.

3. Favorite books and films

My favourite books are :

- Sils Maria on Nietzsche by Michel Onfray :

An article on Nietzsche and the conditions of creation of his works. Onfray refutes the accusations of those who accuse the philosopher of providing ideological weapons to the Nazis, and of those who want him to join the thoughts of the all-powerful desire of the left.

- Nietzsche l'actuel by Julien Rochedy :

A thorough and comprehensive book for understanding and comprehending Nietzsche's great concepts that are more popular and important than ever.

- Twilight of the Titans by Papacito :

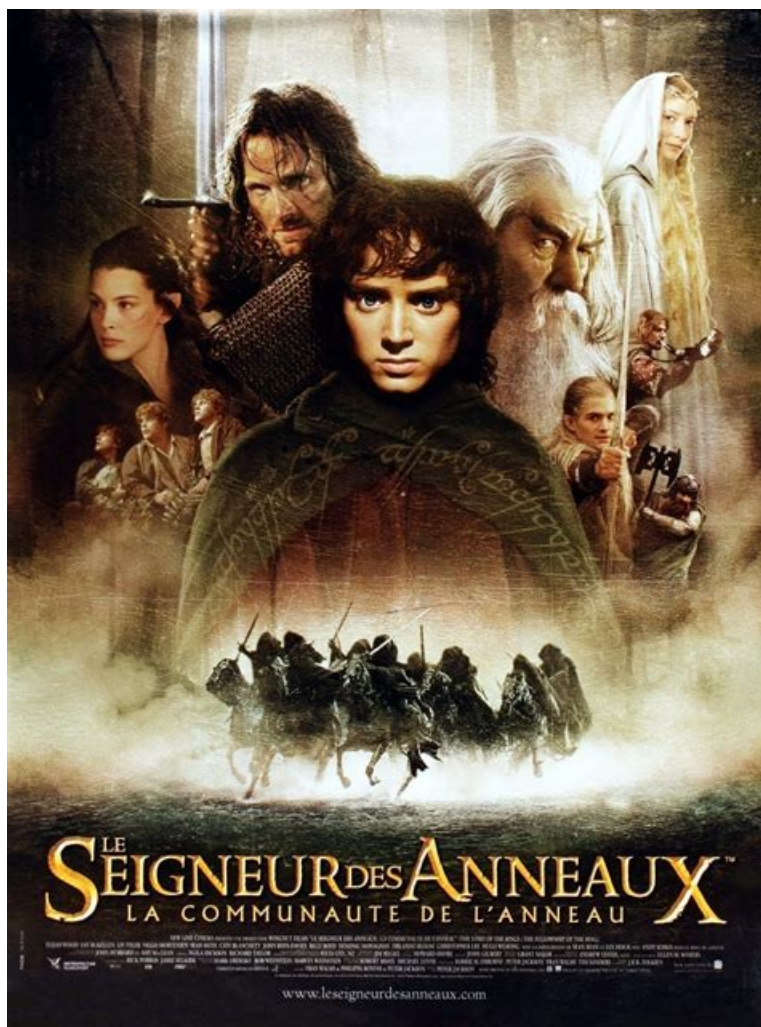

Twilight of the Titans catapults us into the heart of the Middle Ages, be it French, English, Spanish or Germanic.

Everything is told in a humorous, serious and very chilling way about the exciting history of the Middle Ages.

- Various history books

(image inserted in the sites)

Films :

Jeanne d'Arc

UN FILM DE LUC BESSON

4.

Paris is one of the most beautiful cities in the world, or at least it was.

Its historical monuments such as the Notre-Dame-De-Paris cathedral, the Eiffel Tower, the Sacré Coeur, the Tuileries, ... thrill us through their history.

I am happy to live in this city which has a very heavy past despite the last years.

(insérer image de paris, monuments etc)

5.

For me, this IUT is the consecration of what I want to do and will put an end to my studies before entering the working world.

I am very happy to have been able to enter this one.

I chose this IUT because it has everything I want to do within 1 hour of my home. The Networks and Telecommunications course, specialising in CyberSecurity, is particularly what I was aiming for and what I would do later on.

I would like to work in cybersecurity within the French army. I love information technology but also sport, for me I have to be as strong in mind as in body.

To maintain my body and mind is for me the ultimate goal. In the army, you do at least 1 hour of sport a day no matter what your training is, that's why the army represents me the best. Moreover, being able to protect my country against possible computer attacks is a source of pride. To put my passion in the protection, I can't imagine better.
